Journey Based Programs
Bushwalking Camps for Year 7-12

Our Camps

Our programs develop student's knowledge, understanding and skills to strengthen their sense of self, and build interpersonal relationships.

Using content with links to the Health and Physical Education (and many other Curriculum Areas) program activities focus on personal and social skills that can be developed through their participation in the journey based program. These skills include **communication, decision making, problem-solving, critical and creative thinking, and cooperation** and are developed as students work individually and in small teams.

Students **develop personal and social capability** as they learn to understand themselves and others, and **manage their relationships, lives, work and learning** more effectively. During their journey based program students are **making responsible decisions, working effectively in teams, handling challenging situations constructively and developing leadership skills.**

Locations for Bushwalking Journeys

MT LOFTY RANGES
